

Open Science

Open

WHAT ARE WE TALKING ABOUT?

SPARC.ORG

“dissemination of results of research is an essential, inseparable component of the research process”

Wikipedia

Open science is the movement to make scientific research, data and dissemination accessible to all levels of an inquiring society, amateur or professional.

<http://www.flickr.com/photos/wakingtiger/3157622608/>

Opendefinition.org

“Open means **anyone** can **freely access, use, modify, and share** for **any purpose** (subject, at most, to requirements that preserve provenance and openness).”

Sounds familiar?

OPEN ACCESS TO PUBLICATIONS

What?

- Worldwide electronic dissemination
- Of (peer-reviewed) research results
- Free to use, free of restrictions (still referring to source)

How?

- “**self archiving**”: The scientist archives a publication in an openly available repository. This is also known as “**green road** to open access”.
- Publish in an **Open Access Journal**, a freely available electronic journal. This is also known as “**gold road** to open access”.
- “Hybrid”: pay APC to open an article in a subscription journal

Green OA

= Self archiving

- In an open repository / open archive
 - Institutional / disciplinary: always scholarly
 - Interoperable, open standards and protocols
- Deposit a version of your publication and open
- Add links, eg project info, data sets

Check policy publisher: Sherpa Romeo

UGent Open Access journals

Silva Gandavensis

Silva Gandavensis (Sylva Gandavensis until 1979) was published irregularly between 1967 and 2001. The journal published articles on forestry, forest policy, forest research and other forest-related subjects. It was sent to scientific institutions and libraries in exchange for their own publications. Silva Gandavensis was published by the Laboratory of Forestry of Ghent University, which was formerly called the Research centre for silviculture, management and forest policy (1970-1990) or the department of silviculture (1967-1969).

All volumes (1 to 66), published between 1967 and 2001, were digitized. They are listed under 'Archives'. Articles can be searched for based on author, keywords etc. via 'Search'.

OpenAIRE as infrastructure

CHALLENGE: COPYRIGHT

Belgian law

Boek XI Wetboek Economisch recht, Titel 5 'Auteursrecht'

Work of literature or art

E.g. novel, piece of music, photo, painting, book, article

(a bare fact is not protected, a database is protected by database law)

Criteria :

- Certain perceptible form (an IDEA is not protected, only the specific form)
- ORIGINAL : personal stamp of the author after an intellectual endeavor (artistic value is of no importance)
- Created by a human being, not purely by a machine

Rights holder vs. author

- Author = natural person (not a legal person)
- But transfer of rights is possible
- Co-authors should have a creative / personal contribution

- Exploitation rights can be transferred or licenced
- Moral rights cannot be transferred, but can be waived

Retain your CR

How to share without every user knocking your door?

Up front licences

Machine readable

Creative commons (CR protected)

GPL (software)

Apache (software)

ODC (database) / BSD (software)

See <http://opensource.org/licenses>

<http://www.dcc.ac.uk/resources/how-guides/license-research-data>

CREATIVE COMMONS LICENCES - KNOW THE DIFFERENCE

What are creative commons licences?
Creative Commons (CC) licences are legal and social frameworks that complement copyright by permitting sharing and reuse of published content with conditions.

There are 6 types of CC licences...

Which CC licence is best for me?
CC licences allow you, as a creator of content, to be precise about how others may, and may not, use your work. CC licenses are operative only when applied to material in which a copyright exists.

You can choose **1/6** CC licences but once you have done so you are not allowed to change the wording.

CC BY
Others can distribute, remix, tweak, and build upon your work - commercially. They must reference you for the original work and clearly indicate that changes were made to your work.

CC BY-ND
Others can redistribute commercially and non-commercially, provided it is unchanged and in whole, with reference to the author.

CC BY-NC
Others must **not** remix, tweak, or build upon the original work for commercial purposes. New works must also reference the author and be non-commercial, others do not have to license their derivative works on the same terms.

CC BY-SA
Others must license new creations under identical terms. All new works based on your work will carry the same licence, so any derivatives will also allow commercial use.

CC BY-NC-SA
Others can remix, tweak, and build upon your work non-commercially, provided they reference the author and license their new creations under the identical terms.

KEY:
Creative Commons (CC icon)
Attribution (person icon)
No Derivative Works (crossed-out person icon)
Non-Commercial (crossed-out dollar sign icon)
Share Alike (circular arrow icon)

UGent

POLICIES

ID/OA mandate UGent since 2010

- Mandate immediate deposit of full text
- Optional open access (if allowed)
- Final peer reviewed manuscript
- Upon publication
- Access to all publications in the UGent network, partially outside

=> <http://biblio.ugent.be> (green way)

Gold OA

- Memberships
 - BiomedCentral: 15% discount
 - SCOAP3
 - arXiv
- OJS: technical support UGent OA journals
<http://ojs.ugent.be>

Belgium

POLICIES

General

- Most Belgian universities have a ID/OA mandate
- Most have a repository
- Flemish, Walloon and Belgian government have signed Brussels declaration (esp support green)

VLIR

- Open Science working group
- Up to now: emphasis on green road

⇒FRIS portaal

⇒OpenAIRE

FWO

Art. 2, § 2 Following the Berlin Declaration of 2003 for the promotion of free access to scientific knowledge and cultural heritage, beneficiaries of FWO mandates, credits and projects **must deposit** the publications that result from the FWO subsidies in a **public “Open Access” database, within one year** from the date of publication, in order to effect greater impact and valorisation of their work.

Researchers are also advised to publish their other publications in such an "Open Access" database, the so-called "Open Archives", together with the research data that resulted in these publications.

Mandated:

Open repository

Embrago permitted: one year after publication

Advised:

other publications

Related research data

H2020

POLICIES

OA policy in H2020

Mandate for publications

- Each beneficiary will be asked to ensure OA to all peer-reviewed scientific publications relating to its results:
 - Deposit a machine-readable copy of the published version or **final peer-reviewed manuscript** accepted for publication in a repository
 - "**Aim** to deposit" at the same time the **research data** needed to validate the results
 - Ensure OA on publication or at the latest within **6/12 months**
 - Ensure OA to the bibliographic metadata that identify the deposited publication, via the repository
- Both routes will be valid and complementary
- Encouragement to authors to retain their copyright and grant adequate licences to publishers

OA policy in H2020

Pilot for Data

- A limited pilot will ensure OA to some data, on a voluntary basis and with opt-out safeguards
- Beneficiaries will accept to:
 - deposit in an open access repository:
 - the data, including associated metadata, needed to validate the results presented in scientific publications as soon as possible;
 - other data, including associated metadata, as specified and within the deadlines laid down in the data management plan;
 - provide information, via the repository, about tools and instruments at the disposal of the beneficiaries and necessary for validating the results (where possible, provide the tools and instruments).

- (i) required to deposit the research data, preferably in a research data repository and (ii), as far as possible, take measures to enable third parties to access, mine, exploit, reproduce and disseminate this research data.
- At the same time, projects should provide information about tools and instruments at the disposal of the beneficiaries and necessary for validating the results, for instance specialised software or software code.

- **Opt out**

Eg. conflict with obligation to protect results, with confidentiality obligations, with security obligations or with rules on protection of personal data or action's main objective be jeopardised by making specific parts of the research data openly accessible

- **Costs relating to the implementation of the pilot will be reimbursed.**

EU Research Projects

EURO-BASIN
European Union Basin-scale Analysis, Synthesis and Integration (EURO-BASIN)

From 2010-12-31 to 2014-12-30 | [EURO-BASIN website](#)

EURO-BASIN is designed to advance our understanding on the variability, potential impacts, and feedbacks of global change and anthropogenic forcing on the structure, function and dynamics of the North Atlantic and associated shelf sea ecosystems, as well as the key species influencing carbon sequestration and ecosystem functioning. The ultimate goal of the programme is to further our capacity to manage...

Switchbox: Maintaining health in old age through homeostasis

From 2011-02-01 to 2015-07-31, closed project | [SWITCHBOX Website](#)

Project details

Total cost: EUR 8 556 650,3	Topic(s): HEALTH.2010.2.2.2-2 - Homeostasis in human development and its effects on lifespan, FP7-HEALTH-2010-bio-stage
EU contribution: EUR 5 996 688	Call for proposal: FP7-HEALTH-2010-bio-stage
Coordinated in: France	Funding scheme: CP-FP - Small or medium-scale focused research project

Objective

"Healthy aging requires maintenance of homeostatic control of the physiological systems and functions that are integrated by the hypothalamus. Driven by work in previous EU projects (Crescendo/Lifespan) highlighting insulin signalling and the hypothalamic/pituitary/adrenal and thyroid axes in the regulation of aging, SWITCHBOX will examine the flexibility of these neuroendocrine systems in response to environmental challenges in three established human cohorts with variable aging potential. Th...
