Pages: 361-369

**Abstract:**

© Springer International Publishing Switzerland 2014. Progress testing is a common assessment tool within medical schools. A similar assessment tool, the "Progress Test of Information Literacy" (PTIL) has been created. To become an information literate person, information literacy self-efficacy (ILSE) is a meaningful part and important to evaluate. In this study, every PTIL-item has been mapped with an item of the 38-ILSE scale. Even though the mapping turned out to be delicate and context related, the results of this study suggests a relation between PTIL and specific ILSE items. Students of the first two medical years scored better for certain PTIL questions compared to students in the last years. In addition, students from ye...

## 1. MENDELEY: GET STARTED IN 5 STEPS

1. Go to Mendeley.com and create your free personal account.
2. Download the Mendeley Application and open it
3. Install the Web Importer Tool
4. Install the MS Word Citation Plugin
5. Select the *Organize my file*-option in *Tools > Options > File Organizer*

In Mendeley Desktop

## 2. IMPORT REFERENCES: VIA SEARCHING IN A DATABASE

### 1. Export BibTex (.bib) or RIS (.ris)

Google Scholar

The screenshot shows the Google Scholar interface. The search bar at the top contains the text 'Global strategy for the diagnosis, management, and prevention of chronic obstructive pulmonary disease: GOLD executive summary'. Below the search bar, the results are displayed. The first result is highlighted, showing the title, authors (J Vestbo, SS Hurd, AG Agustí, PW Jones...), and the journal (American journal of respiratory and critical care medicine). A red box highlights the 'Citeren' (Cite) button, which is located next to the citation information. A red arrow points from this button towards the citation window on the right.

The screenshot shows the citation window for the selected article. It displays the citation in three formats: MLA, APA, and ISO 690. The citation text is: 'Vestbo, J., Hurd, S. S., Agustí, A. G., Jones, P. W., Vogelmeier, C., Anzueto, A., ... & Stockley, R. A. (2013). Global strategy for the diagnosis, management, and prevention of chronic obstructive pulmonary disease: GOLD executive summary. American journal of respiratory and critical care medicine, 187(4), 347-365.' A red box highlights the 'BibTeX' button, which is located next to the citation information. A red arrow points from this button towards the PubMed screenshot on the left.

PubMed

The screenshot shows the PubMed search results page. The search bar at the top contains the text 'copd'. Below the search bar, the results are displayed. A red box highlights the 'Save' button, which is located next to the citation information. A red arrow points from this button towards the 'Save citations to file' dialog box. The dialog box shows the 'Selection' dropdown set to 'Selection (1)' and the 'Format' dropdown set to 'RIS'. The 'Create file' button is highlighted with a red box and a red arrow pointing to it.

## 2. IMPORT REFERENCES: VIA SEARCHING IN A DATABASE

### 1. Export BibTex (.bib) or RIS (.ris)

Embase

The screenshot shows the Embase search results interface. On the left, there are 'Results Filters' for Sources, Drugs, Diseases, Devices, Floating Subheadings, Age, Gender, and Study types. The main area displays '1,863,037 results for search #1'. An 'Export Data' dialog box is overlaid on the right. In this dialog, the 'Choose a format' dropdown is set to 'RIS format (Mendeley, EndNote)', which is highlighted with a red box and a red arrow. Below this, a list of fields is shown under the heading 'Content:'. The fields are organized into two columns: A1: Author names, AD: Correspondence address, C1: Drug trade names, C2: Drug manufacturers, C3: Device trade names, C4: Device manufacturers, C5: Medline PMID, DB: Name of Database, DO: Digital Object Identifier (DOI), EP: End page, ER: End of record, IS: Issue, JF: Journal Title (full), JO: Journal Title, KW: Keyword, L2: DOI/full text link, LA: Language of article, M1: Author addresses, M3: Publication type, N2: Abstract (English), U1: Abstract (Non-English), SN: Serial number (ISSN/ISBN), SP: Start page, T1: Title (English), T2: Title (Non-English), TY: Source type, Journal, Book, etc, U2: Embase identification number (PUI), U3: AiP/IP entry date, U4: Full record entry date, UR: Web URL - Full record link to Embase, VL: Volume, and Y1: Publication year. At the bottom of the dialog, there are buttons for 'Save export preferences', 'Cancel', and 'Export'.

Pages: 27-47		
<b>Abstract:</b> The aim of this research is to develop and validate a scale for the evaluation of medical students' information literacy self-efficacy beliefs, as this plays a crucial role in the development of lifelong learning objectives. Curriculum developers and medical educators need to have a good understanding of information literacy in order to decide when specific support and training should be integrated in the curricula. The use of a trustworthy, user-friendly tool in a large population able to detect different aspects of students' information literacy self-efficacy beliefs could help to evaluate an entire curriculum. A 5-factor model was developed and validated within a 6-year medical curriculum (n=1252). Internal consistency of the subscales was high ( $\alpha$ : 0.845-0.930). In conclusion, the Information Literacy Self-Efficacy Scale for Medicine (ILSES-M) could be an added value for evaluating medical students' information literacy self-efficacy beliefs. Furthermore, it coul...

D

### Filtering

### Searching free text

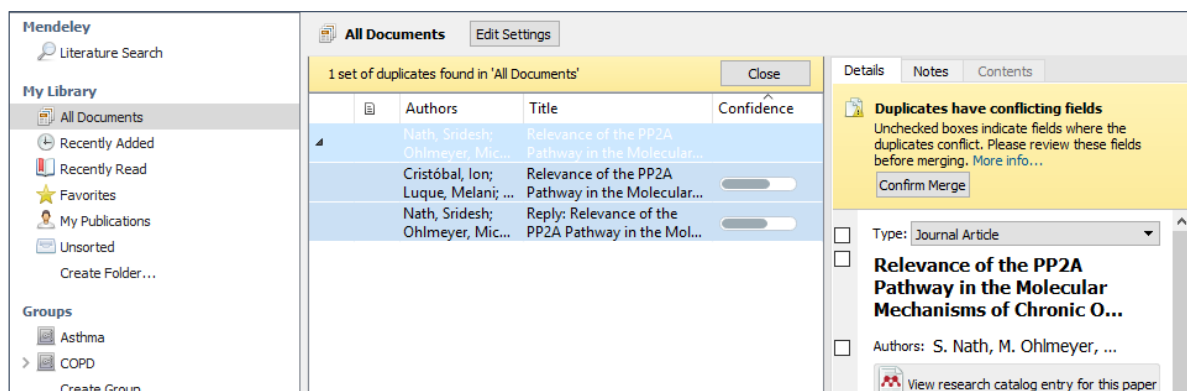

### 3. MANAGE YOUR REFERENCES

#### SEARCH FOR DUPLICATES

## Search for Duplicates

## Confirm Merge

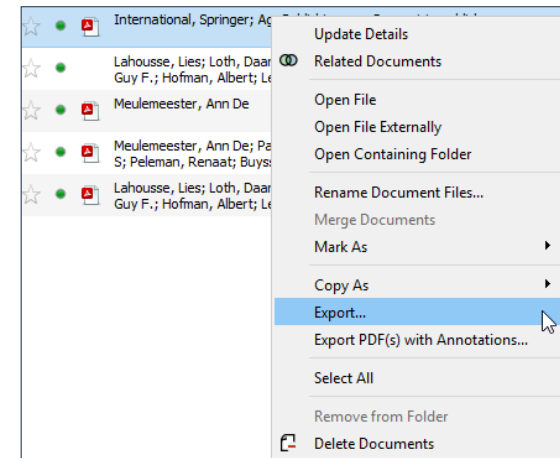

! Comment, correction, reply, conference abstract vs. full paper

## 4. EXPORT YOUR REFERENCES

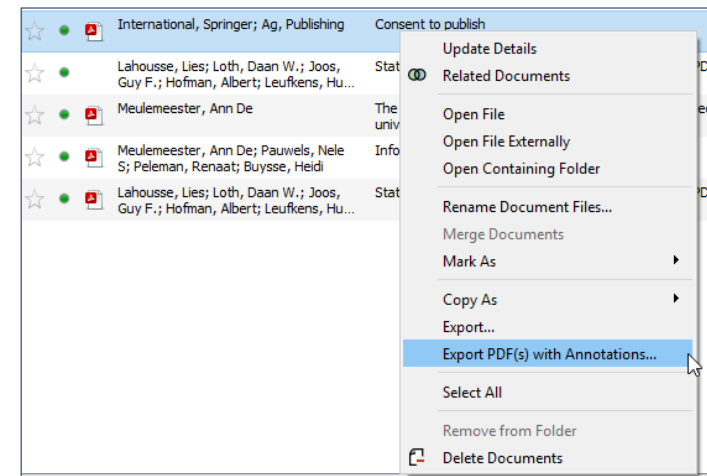

Export reference (e.g. BibTex, RIS or EndNote XML format)

- Right click on reference 

Export PDF with annotations

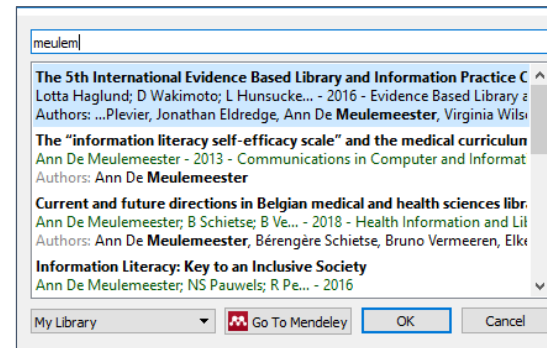

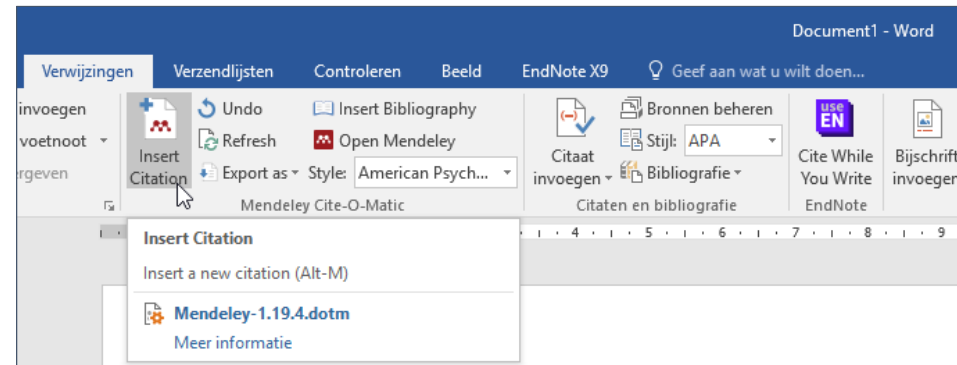

- Right click on reference 

## 4. CITE WHILE YOU WRITE: FROM WORD

### 1. Insert citation

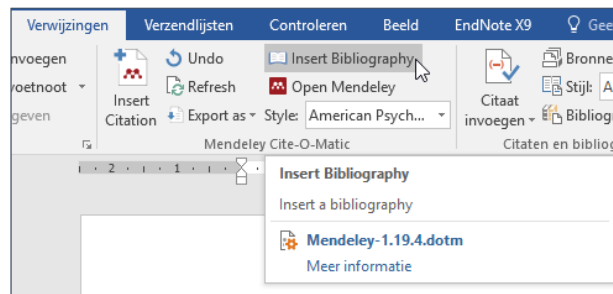

From My Library vs. my groups

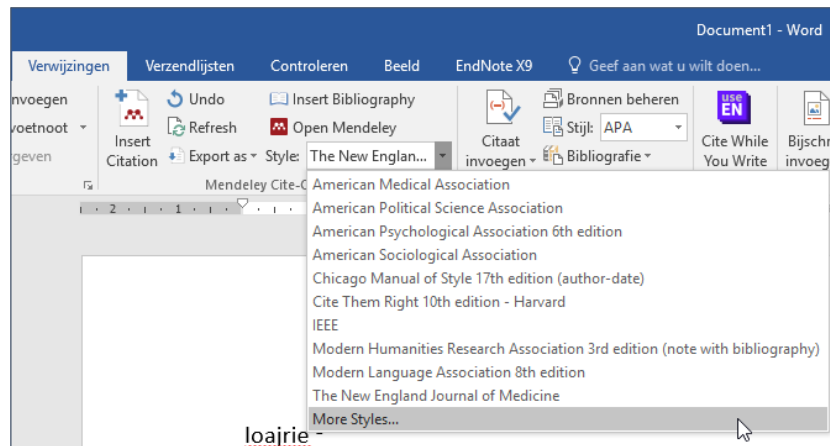

### 2. Create bibliography according to the preferred style (next slide)

## 4. CITE WHILE YOU WRITE: FROM WORD

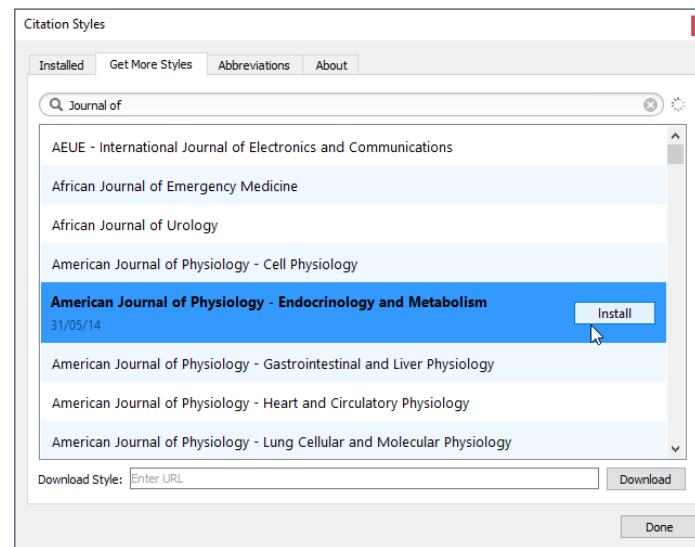

### 2. Create bibliography ('verwijzingen' > Mendeley Cite-O-Matic)

### 3. Adapt output style (Word)

### or install additional style

## 6. SOCIAL FEATURES

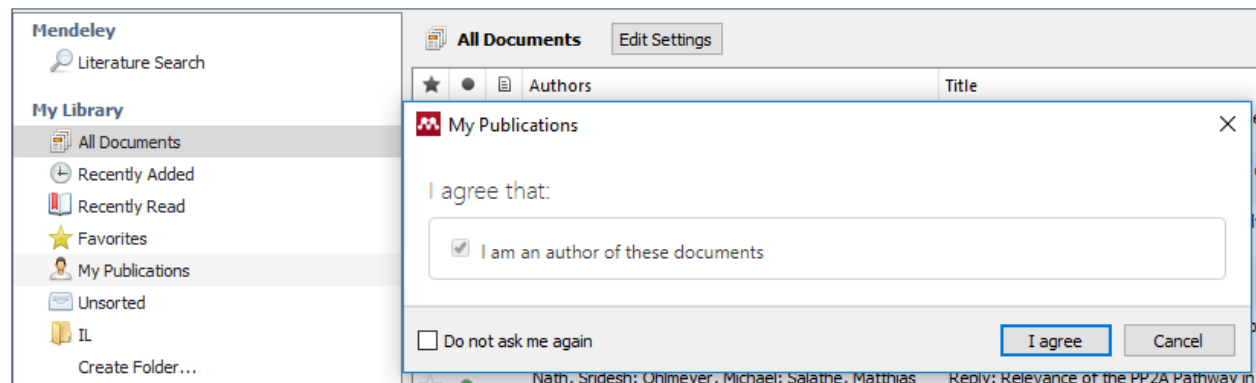

Mendeley = academic social network

Through your [Mendeley Web](#) account:

- a professional online profile
- ability to network with colleagues across different fields

In Mendeley Desktop:

Add your publication in the '**My Publications**' folder => Mendeley provides statistics of the community's interest in your work

# DIFFERENCES BETWEEN MENDELEY DESKTOP AND ENDNOTE DESKTOP:

## SHARING OF USER EXPERIENCES

## ASSETS OF MENDELEY COMPARED TO ENDNOTE

### Import references:

- Easy import from publisher's webpage
- PDF is automatically assigned to reference when using Web Importer Tool

### Manage references

- More structure in My Library
- Easier to share a subgroup of references with colleagues (via groups)

### Cite while you write

- Insert Bibliography where you want

### Social features

## DISADVANTAGES OF MENDELEY COMPARED TO ENDNOTE

### Import references:

- Additional step(s) required
- Extraction of meta-data out of PDFs is less accurate, needs more quality control and adaptations (see next slides)

### Manage references

- Duplicate detection is not applicable for a systematic review (more information & example: <https://osf.io/yzugc/>)
- No smart groups
- No personalized fields (e.g. reviewer 1, reviewer 2)
- No automatic bulk PDF import option

### Storage

- Limited in free version (2 GB in folders ; 100 MB in groups)

### Cite while you write

- Styles not up-to-date (cf. APA 7<sup>th</sup> Edition)

High number of 'readable PDFs' (12/14 records)

Extraction of metadata is not accurate and needs manual corrections (E.g. 'Ann De' as first name, 'setting' as title, missing journal names)

# APA 7TH EDITION IN MENDELEY VS ENDNOTE

## Mendeley
